CONGRESSIONAL NOTES.

WASHINGTON, Jan 25 — Shortly before the house was called to order to-day a number of members were discussing the recent explosion in London. The discussion took place in the cloak room on the democratic side. Among these present were Representatives Cobb and functy. The former expressed timeelf strongly opposed to metals resorted to by Irishmen to effect the result desired. Finerty replied that under the circumstances the explorious in London were justifiable. It was the only way in which the Irish could gain their cause.

"You claim that to be justifiable?" said Cobb "us affaille when the fives of Innocent women and children are jeopartized? If you look upon it in that light you are not humane?" "If am humane, six," reloted Fiberty, "as humane as you a 6, more so,"

PARNELL'S JOURNEY.

CORK, Jan. 25 — Parnell arrived at Militown to-day and furned the first sod of the West Clare railway, about to be constructed. There was an immense assemblage of people, not less than 24,000. Parpell was presented with a ministure golden spade in honor of the occasion in accepting the emblem Parnell indee a brief address. He made no allusion to the dynamite outrages in London, but confined himself to questions affecting farmers and reasonable in so this and west breland Parnell also said in his address that the 1-resent juncture was another turning point in Irish history. The people should unite in vowing feative to the cause of Ireland. He regretted that the land art was not so framed as to insure permanent settlement of the land question. It rested with the people themselves to set an example by which they might recover every sod of land that had been rothed from them. The railway extends from Milliown to Ennis.

THE INFORMATION OF SHIPE.

NEW YORK, Jun 10. The local to Commerce sond, regarding a protest of Boston bank are against settlem and of sub-trassary balances at the clearing honey in silver cartifactus. The fact that how bork banks are not force by the treasury to receive them, is regarded by nany of our last banks as only a safiguard against degradation of our currency against degradation of our currency against the sprige silver standard. That more serpous derangement has not followed the forced acceptaince of soline by Boston banks is only because Boston-is not a financial center. It is an evidence of soline derrugement, however, that silver certificates are even now at discount in this market, and that between banks they are treely bught and sold at one-eighth per contribution. A wall street tunker said yesterday, that the Loston banks helped to bring the growance complyined of upon theuselves. They have been largely in the habit of saving transportation expenses on gold due them here, by depositing in the sub-treasury faking esher certificates in remittance and settling their own cleaning Jouse balances with them. Now they live not got, anything elsa, and finding themselves largely indebted to New York and being unable to settle in siter certificates, they sudeling discover the inconvenience of doing business with an uncurrent form of money.

Farmers Loan and Trust Company Ask for Roceivers

On the 10th of December at the suit of Inw-On the 19th of December at the suit of I awrence Harrison and Lawrence Baker, representing the English and German holters of the first mortgage fonds of the Oregon and Chifornia Railroad Company against the Farmers' Lorn and Trust Company and the Oregon and Iranscontinental Company oor planning that the last e meaning hanging of in arest on their bonds had not been mader and that in their opinion the proceeds of the road were not being properly applied, Judge Deady took charge of the road and exponditures. Yesterday the Oregon and Transcontinental company filed an answer to the complaint of Inwrence Harrison and Lawrence Baker, in which they deny all the allogations therein and ask that Receiver keelings to removed on the ground that he is interest I against the learner.

which they dony all the allegations therein and ask that Receiver keeliler be removed on the ground that he is interest I against the dreigen and Transcontinental Judge Bendy made an order yester av shortening the time for giving notice in the matter, so that it can be heard before him on Minday next.

The karmers Lorin and Trust Company commenced suit in the 1.5 distract our trester by against the O & C R R Co to secure the payment of the second mortgage bonds of the company ment of the second mortgage bonds of the company The complaint alleges that default has been made by the O & C R R Co to secure the payment of the second mortgage bonds of the company in the company is insolvent, and that their property does not constitute adequate security for the amounts due on said bonds. Besides, there are other creditors who are pressing for their claims, and there is danger that pudgments will be obtained, which will see ously affect the interest of bondholders. In consequence of the embarrassed condition of said defondant, orator alleges that it cannot execute is a trust without the interest of bondholders. In consequence of the embarrassed condition of each defondant, orator alleges that it cannot execute is a trust without the interest of all parties be fully ascertained without such recourse otherwise tand by a judicial sale of the mortgaged property. Therefore, until such adjudication is made it on-tor prays that the road may be placed in the bands of a receiver to be appointed by the court. It is further prayed that in account may be taken of the amounts due and payable by said of A C R R Co, and that the court will order that the amounts due on and coupons be pain to bondholders, and that if a default of such payment be made that the road be sold and the pieceal's applied to the 13 ments of the amount due on kind coupons be least to be a sold and the pieceal's applied to the 13 ments the belief of the light morter bands to be held and took and pay be head.

on process applied to the payment of the amount due on said bonds. This case will also be heard next Monday.

The sum and substance of the above is that the holders of the first mortgage bonds have had a receiver appointed. The theorem and Transcontinental company want that meaver discharged and one of their own choosing appointed, and the Farmers Lourand Transconing appoint of, and the Farmers Lourand Transconing appoint on sin that favor.

1) result of the whole matter will probable that the road will be said on, but as in the natural order of things it is will occup as a raily set, parties wanting a rultoad mediant is in any hurry about counting up their lasses.

It would a part that freights now or pled a position of apparent independence but the market does not show such to be the case. No doubt the large engaged hist greatly helps what sellers and undavorably affects freight insemicts as ablippers must dispatch this fleet within the usual time and must agneet new bus uses in consequence. Free wheat buying has naturally followed the large tomage engal, ements white is have method buyers promptly but not to an extent as to cause, any considerable disturbance in values. When shippers shall have filled the loading fice I attention will be paid at w. frieght business. Then, if foreign markets do not improve local wheat values must settle. The fright situation is disappointing, in that it has fulled to prove itself to be of the import more expected of it. However this disappointment can be borne with good will for productive have been be meitted. The course of the foreign market in the past week part onto be called other than surprising. not be called other than surprising. It has gane directly against all hopes and nearly all beliefs in directly against all hopes and nearly all beliefs in manifesting it a downward tendency. Its course must be attributed to the special time of must who have apparently withdrawn from the lights of activity to await new chances and to see how America takes the weaker turn. The statistical position of wheat his been said to be a strong one. There is no reason now to change this statement for the position is the same. To other crusses must then be credited the present depression. Specialtim is one brought for ward, Foreign buyers went into the tradition a rush and paid much higher prices for prompt shipment wheat than form it is hand, thus expressing great conditioned in future bust. with a rush and paid much hisher prices for prompt shipment wheat than for mer is hand, thus expressing great conditioned in future bust ness. Now that prompt shipment values are nearer off coast values the conclusion is forced that speculation is resting. Again the exports from the Atlantic seaboard have been heavy. Or dinarily lower values throad would affect this movement but railroads are entiting rates from three to five cents a bushit and sultra do not freatly feel the declines abroad. They realize but little less for their grain than if forcign values had kept up and full transportation rates had been realized up and full transportation rates had been askinamed. This slight loss is not a serious bar to selling. We of this coast are differently situated and element where the early the foreign depression. Thesday a San Francisco advices say that farm or shave sold no wheat for a week past. Then operations must have been between dealer and shipper. The fact that tarmors have sold no wheat in this time only forces the condition that they fur plicitly believe prices must recover. How long they will continue in this belief wholly depends upon early future events for they cannot steadily refuse to sold. In turn this holding back will prevent an active export trade while making no particular difference in the shipper s postition for be will refuse to charter until there is a prospect of getting wheat

ing without new features WHEAT-Advices quote still lower foreign markets. Mark Lane reports indicate nothing more than a suspension of buying and to this must be attributed the declines. The local market is in light business. Valley receipts are quite free and include parcels on interner account for a vessel to arrive. Quotations are difficult to give closely a buyers bid down but pay up for round lots. Still 4 @1 20 is continued.

DISCOVERY OF TIN -A correspondent writing DISCOVERS OF TIN—A correspondent writing from Drain, Douglas countr, says Considerable excriment prevails over the discovery of a fin mine three miles west of this place. Several claims have been located on a ledge known as the Cleveland and Hendricks ledge. From the character of the rick, experts claim that it is a genuine to mine, and no mistake. Some of the rick has been sent to San Frincisco for a more extensive assay. The mine was discovered by Aaron Alien.

The railway problem, as a congressional question, is complicated and may saided but as the resure now paned it has orly one point, namely, stall mass be the same par mile on long and short lamb? In the passage of the Heagan till the house answered affirmatively, and a strong effort is being made in the senate to place those who oppose this feature of the bill in the light of monopoiets and friends of the railreads as against the people. The especial champion of he Reagan bill in that bidy is senatory 11 yield of vehraska, whose speech on the subject betrayed either gross ignorance or rank hypocrisy. It must be one of the two. Frefessing to have an eye single to the interest of the farmers of Nephraska, Mr. van Wyck advocated 4 plug which, if adopted and carried only a wold be stark and irrefressable runn. Nebraska is a great corn state, and its revenue is mainly derived from the ship near of the Arabeat and the best and park printed by it to the real. The out of the profits of farming in between the Missouri to the Allu tie is the prune factor in the profit of farming in between the Missouri to the Allu tie is the prune factor in the profit of farming in between the was for teris member of congress from New York Kebraska. Only males distant, and his old home, in the valley of the Hudson less than one hindred indees. On the Resignan plan it would cost at least fifteen times as much to transport freight from his new hime than from his old home, and the result would be other an enormous increase in the profits of tarming at he west. A senator who has represented two such extreme constituencies should be especially quick to appreciate the gravity of the proposition which the bill involves, and the proposition which the bill involves, the called boort-hand states would favor the Resignan bill.

programme without gross injustice. To every farmer west of the Alleghauy mountains, the injustice being proportionate to the distance. It is to be expected that what might be called short-haul states would favor the Rangun bill. Delaware, for instance, which is little less than a peach orchard, would no doubt like the same rate per mile for her fruit shipped to New York or Philadelpha as the prairie states for their cereals and meats but Nebraska, being about cequi-distant from the two oceans, is one of the very longest of the long limit states and Mr Van Wyck's constituents can hardly be deceived by the clatter signist monepoly into approxing a policy fraught with disaster. It is quite conceivable that an application of the principle of the Reagan bill to strictly state transportation would work satisfactorily to the greater part of a state, for Chleago, Omaha, St. Louis, and some other largest towns of their respective states are on the state border, and the granger movement naturally almed to discriminate in favor of short hauls. But when it comes to inter-state commerce the further a state is from the semboard the more bordensome would be this policy in question. That a sension who hails from Nebrasks should be a supporter of it is a committed which we will not attempt to read.
